On 5/6/21 Sasol sent R6 the presentation they shared at the 4/21/21 virtual community mtg. The only statements about future work were the following:

Future Permitting Updates

Incorporation of the 2019 VCU Testing for DRE and remove some operating hours that flare serves as backup based on new actual data, anticipated to reduce potential to emit (PTE) for the permit by ~ 3 tpy of EO.

West Lab emissions will be refined and reflect a decrease in EO estimates from sampling activities (decrease TBD).
